

# How to convert PDF-text to PDF-image

First you need to install **Okular** software in your computer.

<https://okular.kde.org/>

For you convert PDF text to image (or similar), you need to complete these steps:

- open Okular,
- open PDF document into Okular and (Figure 1)
- choose menu option "File | Print...".

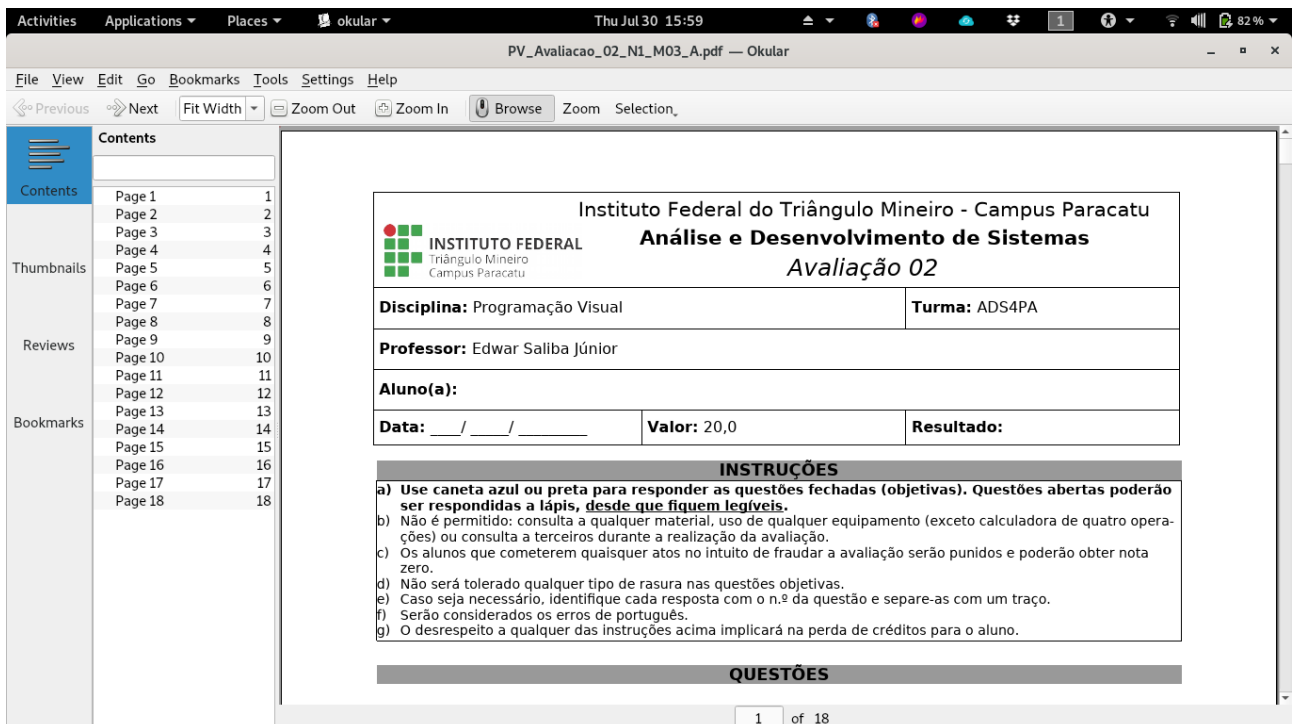

Figure 1: PDF file opened into Okular software.

A print's window will be open, then you must choose the printer "Printer to File (PDF)" (red arrow at Figure 2). And then click "Option" window's button (blue arrow at Figure 2).

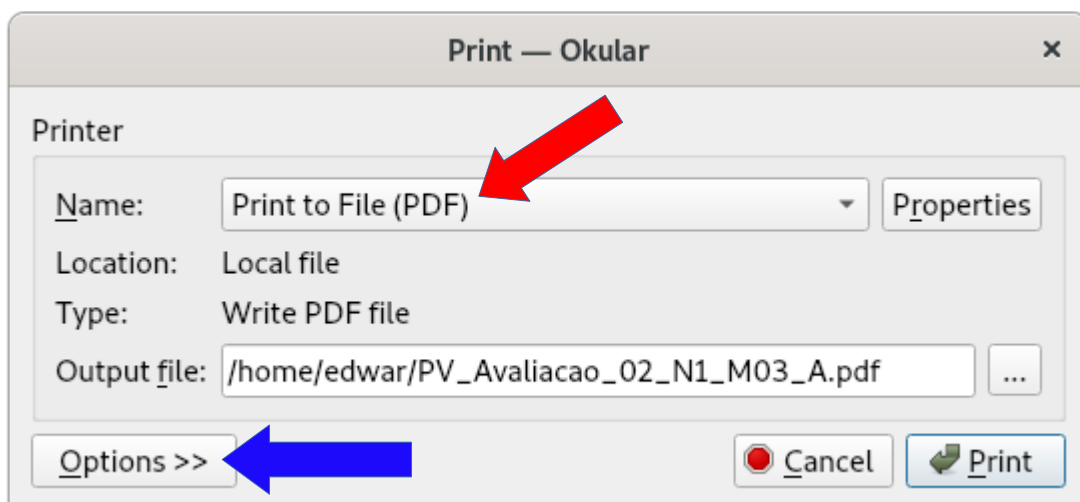

Figure 2: Print's window.

Now, choose "PDF Options" tab (orange arrow at Figure 2) and check "Force rasterization" option (green arrow at Figure 2).

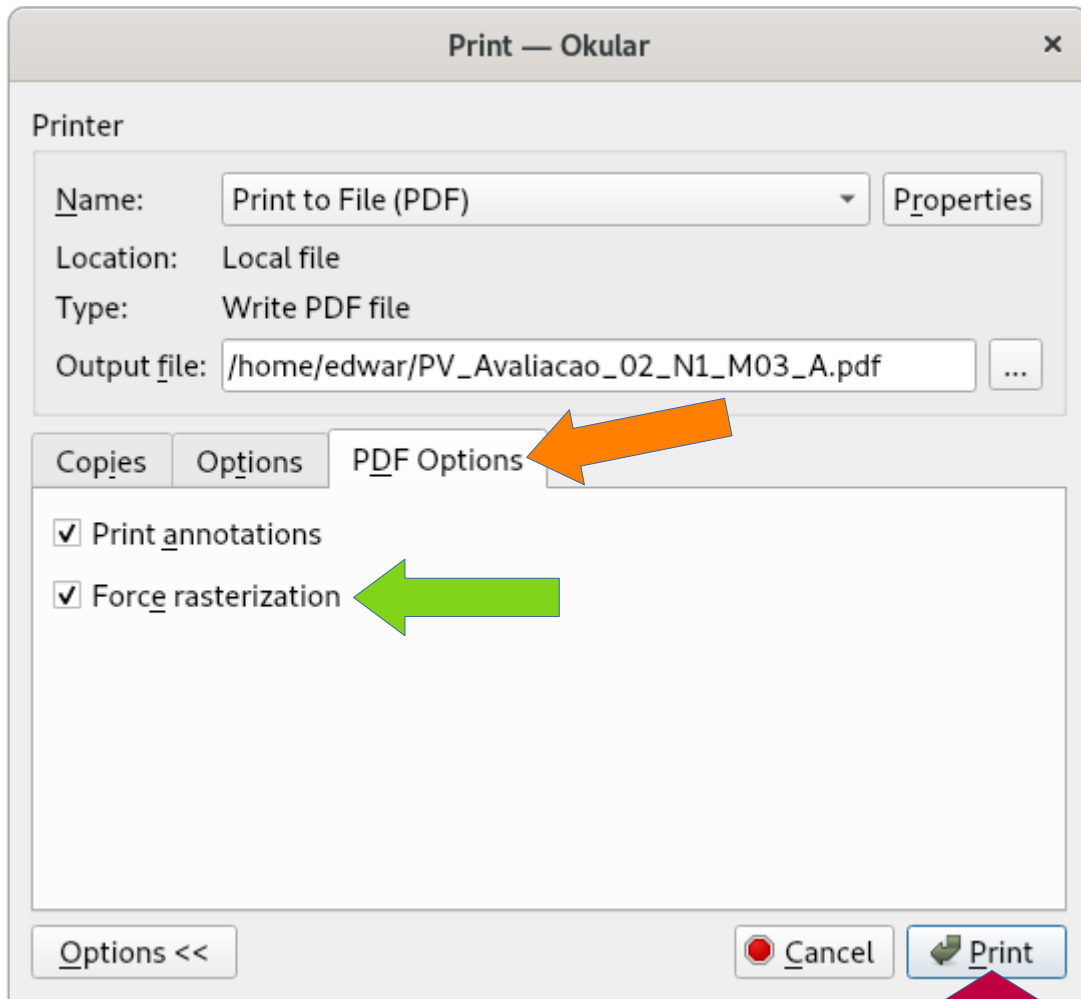

Figure 3: PDF's options.

To finish, click at "Print" button (magenta arrow at Figure 3).
